Data selection & Design Logic:

Bussines Goal Def:

* Credit risk assesment   * Expansion planing
        * Capital allocation decision

main Q & A : ① How healty is the market ② How much can we
                                                                safely expand?
③ wher should capital be allocated
To optimize Risk - adjust returns?

Indicator for:
- grotu ———→ measures macro expanslon & PA
- stabilty ———→ (inflation)
- Leverage ———→ credit Risk & overvaluy

** Stratlgic:

Low	medum	High
↓	↓	↓
aggressive expanslon	moderah gvota	return postuy

** ** protfolio & Scenario planu
- Risk logic
- Expeuld Return Estin
- macty markd

Visualization Design:

bank icon ← | unified credit institu |
| [   ] → descrip |
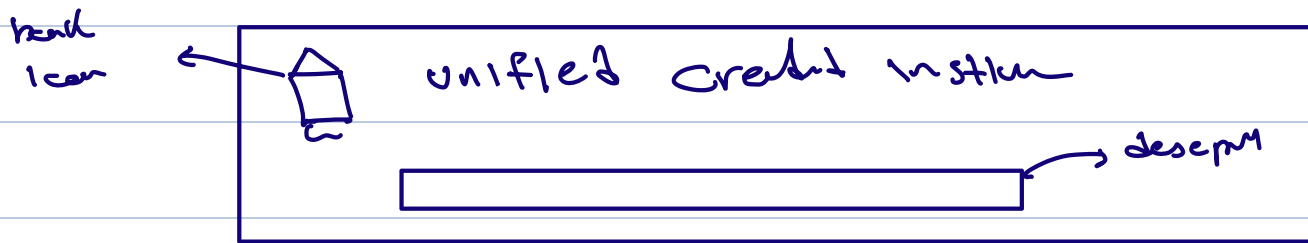

Key performance Indicators:

| GDP | | Inflan | | Credit grth | | Risk Scor | | | → Obj |
